

## ISSUE 1: Mismatch of the Nickname

### Description:

- The issue is that the Create User API doesn't match the nickname stored in the database input to the request.
- It is also seen as inconsistent with API reaction and example values.
- The Nickname gets overwritten during processing, leading to inconsistencies between input, stored data and output.

localhost/docs#/Login%20and%20Registration/register\_register\_\_post

### Login and Registration

**POST** /register/ Register

Parameters

No parameters

Request body required application/json

```
{
  "email": "john.doe@example.com",
  "nickname": "jolly_lion_284",
  "first_name": "John",
  "last_name": "Doe",
  "bio": "Experienced software developer specializing in web applications.",
  "profile_picture_url": "https://example.com/profiles/john.jpg",
  "linkedin_profile_url": "https://linkedin.com/in/johndoe",
  "github_profile_url": "https://github.com/johndoe",
  "role": "ANONYMOUS",
  "password": "Secure*1234"
}
```

Execute

localhost/docs#/Login%20and%20Registration/register\_register\_\_post

### Responses

Curl

```
curl -X 'POST' \
  'http://localhost/register/' \
  -H 'accept: application/json' \
  -H 'Content-Type: application/json' \
  -d '{
    "email": "john.doe@example.com",
    "nickname": "jolly_lion_284",
    "first_name": "John",
    "last_name": "Doe",
    "bio": "Experienced software developer specializing in web applications.",
    "profile_picture_url": "https://example.com/profiles/john.jpg",
    "linkedin_profile_url": "https://linkedin.com/in/johndoe",
    "github_profile_url": "https://github.com/johndoe",
    "role": "ANONYMOUS",
    "password": "Secure*1234"
  }'
